

The image of Gart was on a post-card in one of my first Sweet Maria's orders 15 years ago, just before asking them for a job. To say I was mesmerized by the natural beauty would be an understatement, and I immediately wanted to know more about where the coffees I was buying came from. Yemeni coffee flavors are as unique, and sometimes as challenging, as the growing conditions depicted here in the terraced city of Gart (front). They're special, and I can honestly say, taste unlike any other coffee out there! We're excited to feature coffees from 5 Yemeni growing regions over the next few months, a record for us in terms of diversity. Once again, we are donating 10 cents from every pound we sell to Doctors Without Borders, one of the few humanitarian groups providing aid during the ongoing civil war.

-Dan
